Personal identifiers masked before scoring (4 items)

59.6 / 100

Rank #1 of 14

SHORTLISTED

Why this candidate matches the role

This resume was screened for the role **Data Scientist** (dataset category: Data Science). It contains 9 of the 19 key terms that characterise Data Science resumes in the training dataset and ranks **#1 of 14** with a final score of **59.6/100**. The KNN classifier places the resume in **Data Science** (confidence 68%); the probability for the advertised category is 68%. The main gaps are the absence of: analytics, detection, decision, reduction, predictive. The recommendation is to **shortlist** the candidate.

Score breakdown

Factor	Score (0-1)	Weight	Points
Skill match (dataset keywords)	0.61	35%	21.3
Text similarity (TF-IDF cosine)	0.65	25%	16.3
Experience	0.50	20%	10.0
Education	1.00	12%	12.0
Certifications	0.00	8%	0.0
Final score		**100%**	**59.6**

Keyword evidence

Matched keywords (9)
machine, deep, learning, sentiment, nlp, python, text, science, classification

Missing keywords (10)
analytics, detection, decision, reduction, predictive, scientist, processing, intelligence, visualization, recommendations

Extracted profile

Predicted job category (KNN)	Data Science (68%)
Probability of advertised category	68%
Estimated experience	1.0 years
Highest qualification found	Master's
Certifications found	0
Shortlist rule	score >= 30 and category probability >= 0.34

This report supports, and does not replace, the judgement of the hiring team. Scores are produced by the same weighted rules for every resume; the final hiring decision must be taken by a human.
